| | time data recorder , sampling time set from 1 second to 3600 seconds. |
| * | Manual datalogger is available (set the sampling time to 0), during |
| | execute the manual datalogger function, it can set the different position |
| | (location) No. (position 1 to position 99). |
| * | Innovation and easy operation, computer is not need to setup extra |
| | software, after execute datalogger, just take away the SD card from the |
| | meter and plug in the SD card into the computer, it can down load the all |
| | the measured value with the time information (year/month/date/ hour |
| | /minute/second) to the Excel directly, then user can make the |
| | further data or graphic analysis by themselves. |
| * | SD card capacity: 1 GB to 16 GB. |
